

**TIAA  
DIVEST!**

**DONT  
BE  
FOSSIL  
FOOLED  
BY TIAA**

**TIAA is the largest provider of retirement services** for academic, research, medical, and cultural workers. TIAA is also one of the largest investment companies in the world, managing 1.3 trillion dollars in assets.

TIAA promotes itself as a socially and environmentally responsible company. Last December TIAA's CEO Thasunda Brown Duckett wrote:

*"The climate crisis is one of the foremost challenges that we face as a society today. We are already seeing the effects on our daily lives, ranging from intensifying wildfires to more frequent flooding along coasts and rivers. These climate events affect us all..."*

But TIAA's actions don't match their words...

- TIAA has upwards of \$20 billion invested in fossil fuels, even though most of the pensions they manage are for university faculty and staff, health professionals, and nonprofit workers who care about climate justice.
- TIAA owns over 2 million acres of farmland on four continents. They're the largest accumulator of farmland in the world. These farmland and timberland deals have been linked to deforestation, toxic pollution, and human rights abuses.
- TIAA is invested in the worst climate-destroying companies including Exxon, Shell, BP, Chevron and more. They financed construction of CVE, the largest fracked gas power plant in the Northeast US. They pour money into in the Line 3 tar sands pipeline; the notorious mega Carmichael coal mine in Australia on stolen land; and Formosa Plastics, which would add the pollution equivalent of 3 coal-fired power plants in the already overburdened St. James Parish, Louisiana -- aka Cancer Alley. TIAA is bankrolling the Russian war machine. Shockingly TIAA has \$174 million invested in Russian oil and gas majors Gazprom, Lukoil and Rosneft. They must divest IMMEDIATELY!

**And so far, TIAA has refused to stop funding climate destruction!**

Today we are delivering over 23,000 petition signatures to TIAA's CEO. Join us in demanding that TIAA immediately stop investing in fossil fuels, divest from their current holdings and stop illegal land grabs.
